Nurse-Family Partnership (NFP) International Team

Forum for NFP international Analytical and Research leads: Terms of Reference | July 2024

Objectives:

- To provide a forum for Analytical and Research Leads to discuss and exchange information on data analytical and reporting issues approaches and learning.
- To foster a learning community where Analytical and Research Leads can share challenges and examples of best practice.
- To enable Analytical and Research Leads to provide feedback to UCD on both data analysis and research issues in order to align International NFP practice and learning with the wider NFP research and strategic development of the programme.

As a result:

- All countries are able to use the expertise of others within the group to inform and progress their own work.
- The approaches to the work are debated and innovative solutions are found for common challenges.
- Opportunities for testing innovations collaboratively between countries are explored.
- NFP materials and resources are shared, so increasing efficiency and reducing costs.
- Areas for further action across all countries are identified and an international approach to change is established.

Scope:

- Data analytical practices, including data aggregation, cleaning, completeness, analytical processes and methods.
- Interpretation of findings from data reports
- Interrogation of particular data sets or screening tools
- Use of data reports through the system (team to country)
- Sharing findings of data analyses between countries
- Making recommendations regarding global changes to data sets or research priorities
- Discussion and dissemination of work in external short life groups such as 'Task & Finish Group'
