

AUTHORIZED ADDITIONAL MODEL ELEMENT: [INSERT COUNTRY NAME HERE]

Where the circumstances of a country or the population being served are such that there is a need for an Additional Model Element to be added to the 14 existing Core Model Elements, this document must be completed in order for the additional element to be authorized by Dr Olds. International Consultants will provide guidance regarding the development of the additional model element and the completion of this document.

Element # :

Insert the number and text of the additional model element here

DEFINITION:

Insert any additional definitions that you feel are required to fully explain and delineate the element here

RATIONALE:

Insert the rationale for this additional model element here. This may include the special characteristics of your country that make this addition necessary or favourable.

DESCRIPTION:

Describe the activities that the model element will support here. This may include the functions of additional roles or other activities.

SUPPORTING EVIDENCE/LITERATURE:

As these will be new adaptations to the program model, there are unlikely to be any research findings relating to this role in NFP at its introduction. However, it is expected that countries identify and review evidentiary literature in similar fields and use these to develop any additional model elements to be used. A brief description of the evidence findings should be included here, along with a description of the way that the new element will be evaluated over time.

PRACTICES THAT SUPPORT IMPLEMENTATION OF THIS CORE MODEL ELEMENT:

Insert here any expectations you have regarding how this new element will be implemented. This may include educational curricula for new roles or working practices for new procedures etc.

PERMISSIBLE VARIATIONS:

It is unlikely that countries will be aware of variations that are acceptable in the application of the model element at the outset, but over time this may become clear

HOW CORE MODEL ELEMENT MEASURED AND ANALYSED:

Describe here how you will measure adherence and impact of the additional model element here.

BENCHMARK(S):

Please add here any benchmarks that you will use to indicate the expectations in relation to adherence to the model element. This may include both already existing benchmarks for the program or new ones for this element specifically

AUTHORIZATION:

Additional Model Element authorized by Dr. Olds on (date): _____

Signature: _____

Every additional model element must be authorized by Dr Olds. This is verified through the addition of his signature to the completed document.
